## Cyber Safety

### Locket Widget

You may have received information about the Locket Widget - a direct link added to a home screen that displays shared photos. However, in case you did not, please be aware of this photo sharing widget. While it may appear harmless, there are a number of important features that parents and carers should be aware of, as they could pose safeguarding concerns for both younger and older children, including:

- Instant photo sharing to the users you choose
- 13+ age registration so none of our pupils should be using it
- No way of recovering or deleting any photos that are shared

Please [click here](#) to find out more.
